Alzheimer Patient Regains Memory!

アルツハイマー患者が記憶を取り戻す!

グッドニュースをお知らせします。今回はアルツハイマー患者の話です。アルツハイマー患者やその家族の方々は隠れるように暮らしており、あまり人前に出てきて色々と症状や容態等について話されないし報告されないので、MMS を使用されても結果が分かりにくいのですが、今回は、アルツハイマーである一婦人の息子さんが報告してくれました。医者にかかって数年間になるのですが、MMS を使い始めて同婦人の容態が改善したで、もっと続けると話されました。

この息子さんは治療のためにとMMS を使い始められてから、同婦人は2週間に以内に明瞭に思考できるようになりました。(この婦人が証言しました。)それから、多くの記憶が戻ってきました。また、完全に治ったのではないのですが、昔の正常な生活ができるようになったそうです。色々な徴候から判断すると、同婦人は数週間以内に回復することでしょう。

医薬品を使って、アルツハイマーがこのように短期間に治癒したケースをご存知ですか。アルツハイマー病がこのように短期間で治癒したと知らせる医学報告書はありません。9月8日現在、同婦人がMMSの使用を始めてから3週間経った時であり、今朝、彼女と電話で話しましたが、もっと記憶がはっきりしてきて、物事をはっきりと考えることができると発言していました。

医学関係者の方々は、それでは二重盲検試験はしたのかと聞かれるでしょう。私達は近いうちにこの二重盲検試験を実施できるかも知れません。現時点では資金がありません。同婦人が許可されるのであれば、希望者を集めて、直接この女性、息子さん、さらには近所の方々に会って調査を進めることができるでしょう。

Alzheimer Patient Regains Memory

I thought you would like to hear about another miracle. This time it is an Alzheimer patient. We haven't found many Alzheimer patients as they are often hidden away somewhere and always have relatives that know better. But in this lady's case her son had watched the medical doctors do absolutely nothing for years and he has seen MMS do something, so he was willing to try.

Within two weeks she was back to thinking clearly. (Who knows how clearly, but that is what she says as opposed to saying that she could not think at all.) In addition, much of her memory had returned. In fact, she is not only remembering what she ate but what spices were in the food! She is remembering details!! Of course, she is not totally cured yet, but she is back to living her life. All the indications are that she will be well in a few more weeks. Have you ever heard of a medical drug doing anything similar in such a short time? Well, if you did hear of such a thing, it was not true, because there are no such medical reports. As I write this sentence (9/22/2010) this lady has finished her 3rd week and a telephone call to her this morning proves she is feeling even better with even better thinking and more memory returned.

I know, You're Thinking, "Where's the Proof?" Where are the double blind clinical trials? Well, we will probably get some of those trials soon. We simply haven't had the money for such trials so far. We are hoping to get the money to fund such trials. Meanwhile, if you absolutely wanted to prove it to yourself we could organize a trip for a group of us to visit this lady. She'd be OK to see a group and you could talk to her neighbors to find out how she has been doing for the past 5 years, and we might even be able to get her doctor to visit while the group is there. But do you see, the simpler thing is, why try to prove it?
